Unique Micro-Fermenter

A MICRO-FERMENTER FOR FAST AND EFFICIENT PRODUCTION OF SEED CULTURES AND SAMPLE SCREENING

- Reproducibility** - Patented Cytomaia® technology ensures result reproducibility
- Increased Control** - Real-time monitoring of growth cycles
- Customize** - Bespoke protocols for unique screening and controlled seed culture production
- Adaptable** - Programmable temperature and rotor speed
- Easy To Use** - Septum port for sampling or addition to culture via inlet or outlet
- Efficient** - Small sample volumes reduce resource commitment and cost of screening
- Up-scalable** - Results up-scalable to larger working volumes for process
- Versatile** - Two chambers able to run different protocols independently
- Inexpensive** - Disposable vessels supplied pre-sterilised

Speedy Breedy - Providing precision control with minimal resource commitment
